

Sawing Circle Recap for 6.20.23

If you are doing the Dessert Meets Ocean Challenge, remember that you only have to use **one** of the three pieces of sea glass that we sent you. We aren't mee@ng next Tuesday, the Fourth of July. Our Sawing Circle challenge for our next mee@ng on July 18th: share one or more pieces of art that you own that inspire, amaze or delight you. They can be metal--or not. Have a safe 4th, everyone. See you on the 18th! ~ Dusky

AQer we all caught up with each other, we got to see pictures of Jean's new studio. If you would like to book bench @ne, email her at jfranceschiello@sbcglobal.net.

We didn't have many par@cipants in our June pirate/ocean challenge—everyone is very busy with summer. Karen S. is making tons (well, lots) of jam! But Dale shared his pirate chest and the treasures within!

I showed a piece I created some 0me ago using sterling over a dichroic glass cab I made.

Here's Kathe's piece, "Under the Sea": the fish is made of azurite and malachite.

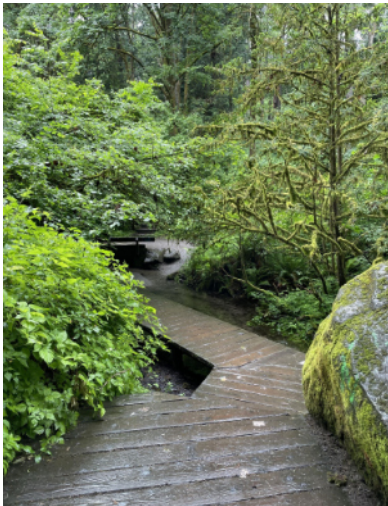

Marianne created an ocean brooch in the past; the background is @anium.

Kathe showed us Marcie the Mar0an, one of the pieces she entered into the State Fair (and got 2nd place!). She also entered a vase in the fair and won 3rd place.

Cynthia showed us a locket she made.

Anne taught in SeaEle last week, and Ame shared some beautiful photos from their trip.

And I gave a much less verdant presentation on cholla cactus, one of the mystery elements for our Ocean Meets Desert Challenge. (It's currently 109 here in Tucson. Send pics of greenery—and water!)
